01

Our vision

Why we are here ?

Investment in Europe by round size (quarterly)

Source: Dealroom.co

The startup ecosystem is changing and turning into a huge marketplace, **sometimes risky.**

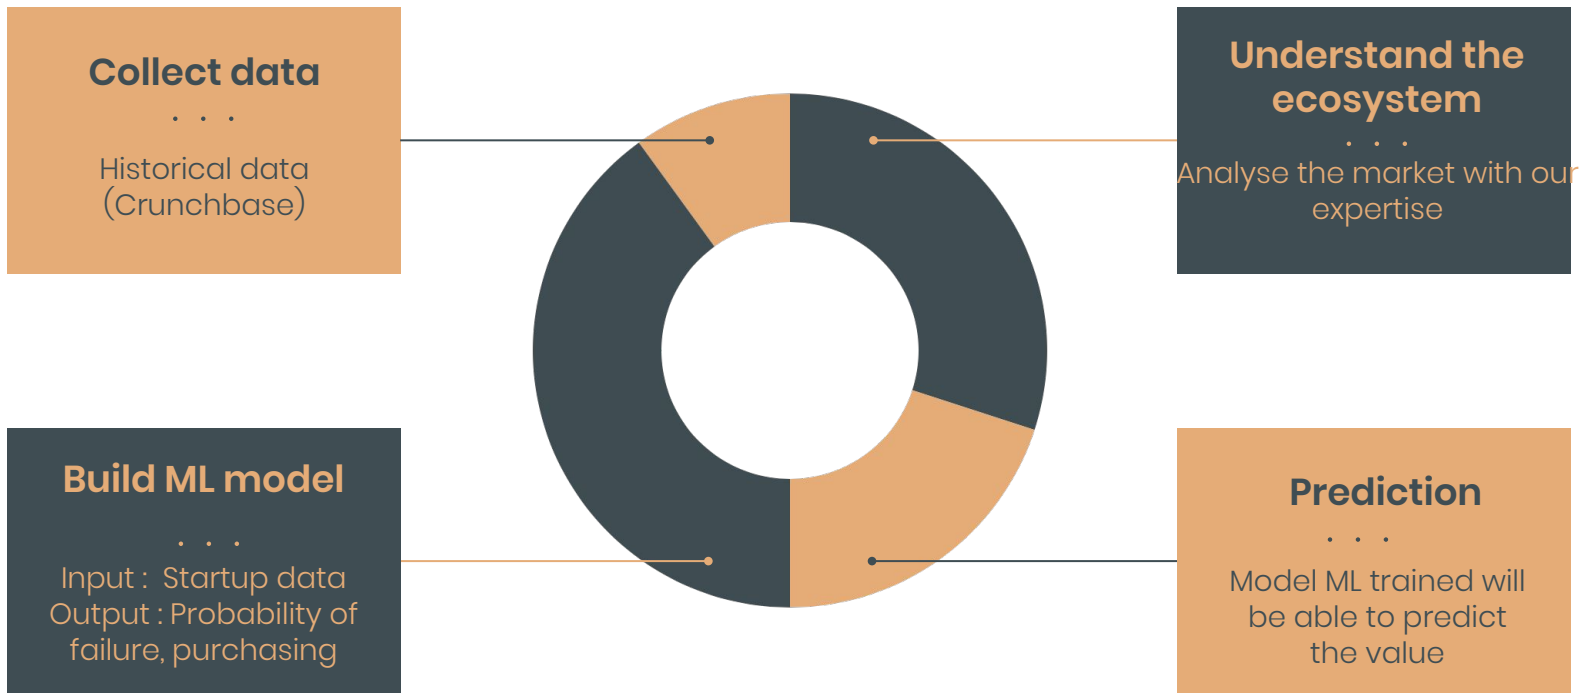

The startup value is often based on very **uncertain** things, like estimating cash flows or forecasting growth.

02

About the **project**

Offer rigorous assessment of the startup
key factors, by giving only
outputs **calculated and observed.**

Project Description

Build insights

**Provide investment
direction for
Venture Capital**

**Boost and diversify
your investments**

**Securing your
portfolio**

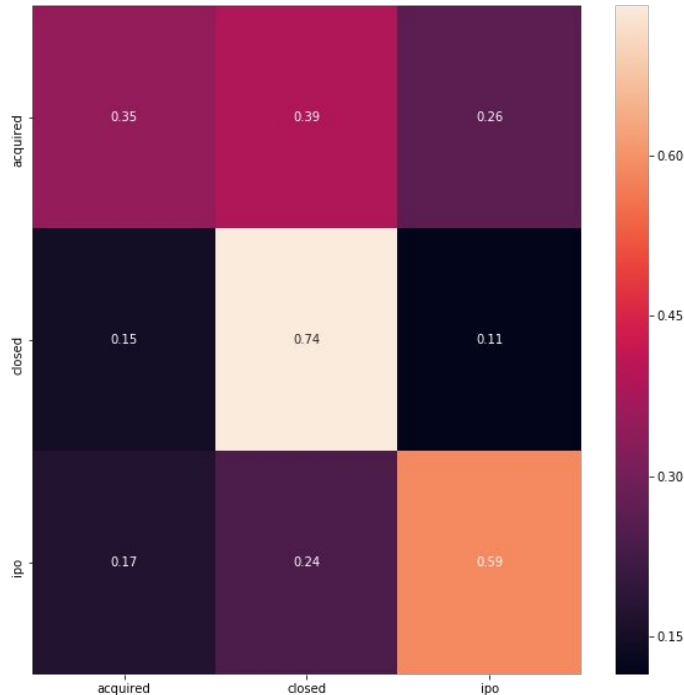

03

Predicted results

We have a POC,
that POC is not bad, with
good performances.

Predicted Results

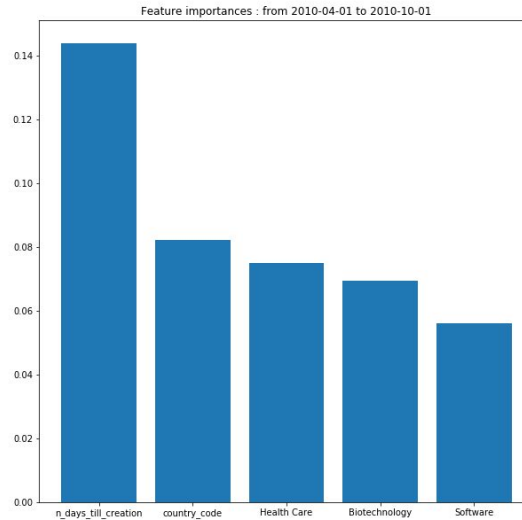

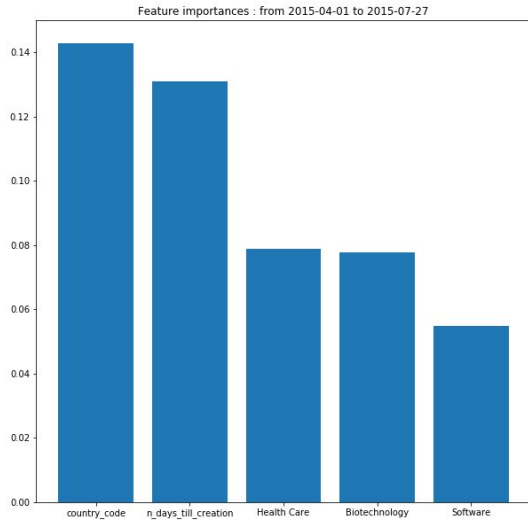

From 2004 to 2016, we can predict whether the start-up will be **bought, sold** or **traded**.
Regarding the results of the IPO or closing, our model gives promising results.

Our model succeeds to predict

- **35 %** start-up are **acquired**
- **74 %** start-up are **closed**
- **59 %** start-up are **IPO**

Features

Our model indicates the most important features in real time who have an impact on the determination of the value of the start-up

Our performances

1,3 of chance to
have a successful
investment

vs 0,78 market
observed average.

Average
performance :
53% on each
investment
